

MATH 111
EXAM 01

BLAKE FARMAN
UNIVERSITY OF SOUTH CAROLINA

Answer the questions in the spaces provided on the question sheets and turn them in at the end of the class period. If you require extra space, use the back of the page and indicate that you have done so.

Unless otherwise stated, all supporting work is required. Unsupported or otherwise mysterious answers will **not receive credit**. You may use a calculator, but you may **not** use a Computer Algebra System (CAS) or any other electronic device whatsoever, **including cell phones**.

Name: _____

| Problem | Points Earned | Points Possible |
|---------|---------------|-----------------|
| 1 | | 3 |
| 2 | | 6 |
| 3 | | 2 |
| 4 | | 3 |
| 5 | | 3 |
| 6 | | 3 |
| 7 | | 16 |
| 8 | | 16 |
| 9 | | 16 |
| 10 | | 16 |
| 11 | | 16 |
| Bonus | | 10 |
| Total | | 100 |

1. DEFINITIONS

1 (3 Points). *Fill in the blanks with the correct factorizations.*

(a) $A^2 - B^2 =$ _____.

(b) $A^2 + 2AB + B^2 =$ _____.

(c) $A^2 - 2AB + B^2 =$ _____.

2 (6 Points). *Let a, b be non-zero real numbers and m, n integers. Fill in the blanks*

(i) $a^0 =$ _____,

(ii) $a^{-n} =$ _____.

(iii) $a^m \cdot a^n =$ _____

(iv) $\frac{a^m}{a^n}$ _____

(v) $(a \cdot b)^n$ _____

(vi) $\left(\frac{a}{b}\right)^n$ _____

3 (2 Points). *Given an equation $ax^2 + bx + c = 0$, the solutions are given by the Quadratic Formula. State the Quadratic Formula.*

4 (3 Points). *Fill in the blanks:*

To make $x^2 + bx$ a perfect square, add _____. This gives the perfect square

$$x^2 + bx + ______ = (x + ______)^2.$$

5 (3 Points). *Fill in the blanks:*

An equation in variables x and y defines the variable y as function of the variable x if each value of _____ corresponds to exactly _____ value of _____.

6 (3 Points). *If $f(x)$ is a function of a variable x , state the formula for the net change between the inputs $x = a$ and $x = b$, with $a \leq b$.*

2. PROBLEMS

7 (16 Points). *Consider the equation*

$$y^2 + 3x = 9.$$

(a) *Does this equation define y as function of x ? Briefly justify why or why not. If it does, give the value of y when $x = 5/3$.*

(b) *Does this equation define x as function of y ? Briefly justify why or why not. If it does, give the value of x when $y = 3$.*

8 (16 Points). *Let $f(x) = x^2 + 3$. Compute the net change between $x = 3$ and $x = 5$.*

9 (16 Points). *Add the following rational expressions and simplify the result,*

$$\frac{2}{1-x^2} + \frac{1}{x+1}.$$

10 (16 Points). *Solve the equation*

$$x^2 - 4x + 2 = 0$$

for x .

11 (16 Points). *Solve the inequality*

$$0 \leq x^2 - 4$$

for x . Express the solution using interval notation and graph the solution on the number line.

12 (Bonus - 10 Points). *Derive the Quadratic Formula, as stated in Exercise 3. [Hint: Use Exercise 4].*
